I think its a sad day when my government tells me what I can listen to and what I cant on a radio ie: xm or sirius. I think the government has done quite enough already with satellite tv when the industry attempted to throw a blockade up from local channels being displayed on dishnetwork and dtv. Hasnt the governement got enough control? I have to wear my seatbelt in a 3000 pound car or I get a ticket but I can ride down the interstate without a helmet on my 375 pound motorcycle thats capable of 0 to 100 mph in seconds? What a scam.

I think the gov. needs to stop trying to be everyones mother and let the people have some say in what they want for a change. This is NOT the land of the free and home of the brave unless you do what your told. This country is somewhat communist in its structure in my opinion but im still very much proud to be a usa citizen and have seen the likes of a thirdworld country. I love my living conditions here in the states I think the gov. needs to simply wakeup and look at what the people want for a change instead of corporate america.
